

Quality Policy

Australian Decommissioning Services is engaged in three strategic activities, specialist decommissioning and demolition; land remediation services and plant dismantling services. I am committed to providing a safe and healthy work environment for our employees, contractors, customers and visitors.

Australian Decommissioning Services aims to be the leading supplier within each of its businesses' areas of expertise with transferable business processes that can be replicated in other geographies and like applications.

Our aim is to build bigger and better businesses by consistently meeting the requirements of our customers and other key stakeholders with our promise of sustainable solutions. To achieve this aim, their expectations, needs and requirements must be identified and met.

We are committed to a policy of continual improvement, with measurable quality objectives established and subjected to review, to ensure that the quality of services offered by the business continues to meet our customers' needs and expectations.

We believe that the key to success in this regard is our business management system which is based on the International Quality Standard – ISO 9001. Our system ensures that effective controls are consistently applied to our work processes and provides a record of our quality-related activities.

We are committed to maintaining and continually improving this system. All employees and suppliers are invited and expected to share in the commitment. We will ensure that this policy is communicated internally and made available to the public and have allocated sufficient resources to ensure that the quality remains at the heart of our business.

Any suggestions that may assist us to achieve our aim aims are welcomed.
