

Ausdec^om

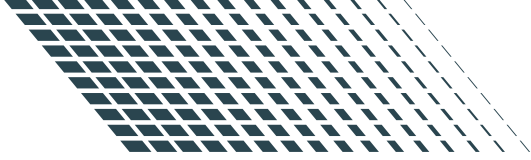

ADS Background

*Alex Fraser has operated for the past 130 years in the Decommissioning, Demolition, Remediation and Salvage industry. 4 generations of the **McKellar family** have owned and operated the Alex Fraser business since 1926. In late 2010 the **McKellar's** sold Alex Fraser to the Global Corporation, John Swire and Sons (JSS). In early 2013 JSS decided to close down the demolition arm of Alex Fraser. This business has now been re-started by the **McKellar Family** as **Australian Decommissioning Services**.*

Jamie McKellar is the Managing director of **Ausdecom** (Over the past 40 years Jamie successfully built the Alex Fraser business into a 100 million dollar PA entity) **Sam McKellar**, Jamie's Son is the General Manager of **Ausdecom** (Sam has spent the past years as the General Manager of Alex Fraser Demolition) Sam has a significant set of demolition and environmental decommissioning experience. **Ausdecom** has secured the key personnel and equipment from Alex Fraser demolition. This ensures that **Ausdecom** has a significant set of experienced decommissioning, demolition, dismantling, waste management and environmental remediation operators, site managers and project managers.

Decommissioning and Demolition
Safe-Smart-Solution driven

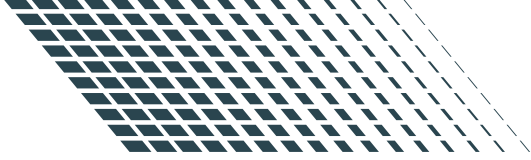

Our approach is to always focus on the safest process we can undertake to meet project, client and community objectives. This approach is underpinned through the combination of many years of demolition experience with the use of advanced specialist demolition equipment. Our capable demolition teams are continually completing integrated demolition and remediation projects across a broad range of environments. Our strength relates to not compromising on safety while continuing to review and learn from each project we undertake. This ensures our clients receive the highest level of safety combined with Environmental, Financial and Project outcomes.

Demolition is a high risk industry, we minimise your project risks through the implementation of leading edge Controls and stringent monitoring processes. Our “live management and control system” provides up to date safety, environmental, project, financial and milestone reports for clients on each of the projects that we are undertaking.

Smart project planning enables **Ausdec om** to undertake strict site demolition and targeted waste segregation programs. This combined with our overall approach to waste minimisation ensures that we aggressively recycle resources on each of our projects. Within Australia are one of very few companies capable of consistently demonstrating the ability to recycle most of a sites demolished materials.

Australian Decommissioning Services reputation for the excellence of our demolition solutions results from our track record of undertaking a broad set of projects across a range of high risk- environmentally and historically sensitive environments .

We are undertaking works in live petrochemical plants, production sites and explosive manufacturing facilities as well as many projects across the mining and industrial sectors.

Dismantling
Maximising Returns Through Dismantling

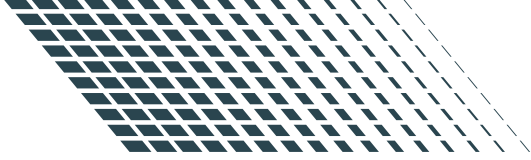

Carefully decommissioning plant and equipment ensures that redundant or surplus plant can be sold for re-use elsewhere, enabling you to maximise residual value and potentially offset costs. Our dismantling and decommissioning division can provide you with a set of product solutions tailored to your plant, site and company needs.

Dismantling can be undertaken in a range of scenario's including the removal of single machines, entire process plants or the deconstruction of buildings, dismantling requires a skilled and careful assessment of the construction process.

Our broader approach to Decommissioning, Demolition and Remediation projects retains the same in-principle approach. Can we re-use, re-purpose or recycle any of the materials that we handle through the projects that we undertake. This set of principles underpins our Business.

Australian Decommissioning Services undertakes a range of dismantling services to ensure you receive the highest value next use of your redundant plant and equipment.

Land Remediation
Maximising Future Legacy
Land value

Ausdec om is an industry leader in demolishing, treating, cleaning up and making safe contaminated sites for a broad range of future land uses. Many of our Historic black and Brown field project sites have been developed into residential, commercial and open-space uses meeting our clients' needs and those of future generations.

Our business provides integrated land remediation solutions that include:

Strategic and Remediation planning cost and scenario development- Developing a range of, treatment and operational project solutions which assist in underpinning the decision making process at the planning stage of site re-development.

Principal remediation contractor services- Implementing Safe, Smart and outcome driven project processes. We carefully define and implement Safety operational, financial, environmental and overall project objectives within our experience.

Site and Project Management Services business - **Ausdec om** combines smart decommissioning and demolition experience with innovative environmental site remediation solutions.

Our experience:

We have a broad range of experience and exposure to using sophisticated treatment and waste disposal techniques, including bio-remediation, thermal desorption and permeable reactive barriers to remove, relocate or denature contaminant – pesticides, preservatives, solvents, and hydrocarbons – and replace asbestos impacted soils with compacted engineered fill to meet specific project and future use standards.

Our broad set of project experience ensures we are aware of and plan for the appropriate integrated protection of heritage, archaeological, flora and fauna and other required site specific needs. We are also aware of the broader set of applicable legislative State and Federal controls.

Our knowledge of recycling and reusing materials offers you the opportunity to maximise returns from the remediation process and gives you the assurance that project requirements will meet with agreed objectives. Where possible we process excavated materials for suitable on-site re use or removal to controlled landfill sites, ensuring engineered development platforms.

Ausdec om's experience managing large Decommissioning, Demolition and Remediation sites, our safety focused highly experienced workforce and fleet of current plant and equipment. Combine to ensure we consistently meet safety and project outcomes on large remediation projects across Australia.
